

Cyber Guardian Security Report

Generated: 2026-07-11 01:23:37

Host: LAPTOP-VB1U5GE5

OS: Windows 11

Python: 3.13.14

Security Score: 47/100

Grade: D

Firewall: Active

Open Ports: 1

Antivirus: Windows Defender

Outdated Packages: 0

Active Users: 5

Suspicious Processes: 14

External Connections: 12

Security Recommendations:

- ■ Disk space healthy
- ■ Modern Python version
- ■ CPU usage normal
- ■ Low available RAM ({available_ram}GB). Close unused applications.
- ■ Warning: Medium-risk ports OPEN: 445 (SMB). Consider closing if not in use.
- ■ Firewall is Active
- ■ 12 connections to external IPs detected. Review for data exfiltration.
- ■ 24 established connections monitored (normal for active system)
- ■ 5 user accounts (within normal range)
- ■ Guest account is disabled
- ■ CRITICAL: 14 suspicious processes found: OmenCap.exe (PID: 2584), vmware-usbar...
- ■ High resource usage: System Idle Process - CPU: 798.4%, RAM: 0.0%
- ■ High resource usage: AppHelperCap.exe - CPU: 109.0%, RAM: 0.3%
- ■ High resource usage: turbo_vpn-service.exe - CPU: 98.9%, RAM: 0.0%
- ■ Windows Defender real-time protection is ON
- ■ Windows Defender: Cloud-delivered protection is OFF
